

Week 5: Outer Space Vocabulary (LAMP)

outer space

the region beyond the Earth's atmosphere in which there are stars and planets

astronaut

a person who travels in a spacecraft into outer space

look/see

To notice or become aware of (someone or something) by using your eyes

spaceship

a vehicle that is used for travel in outer space

sky

the space over the Earth where the sun, moon, stars, and clouds appear

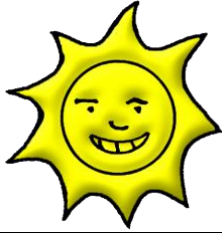

fly

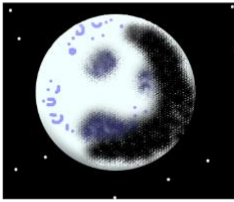

to move through the air especially at a high speed

sun

the star that the Earth moves around and that gives the Earth heat and light

moon

the large round object that circles the Earth and that shines at night by reflecting light from the sun

stars

any one of the objects in space that are made of burning gas and that look like points of light in the night sky

planet

a large, round object in space (such as the Earth) that travels around a star (such as the sun)

night

the time of darkness between one day and the next : the part of the day when no light from the sun can be seen and most people and animals sleep

telescope

a device shaped like a long tube that you look through in order to see things that are far away

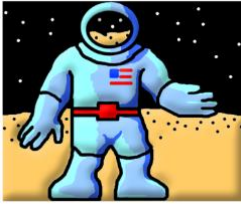

Week 5: Outer Space Vocabulary (Unity)

outer space

the region beyond the Earth's atmosphere in which there are stars and planets

astronaut

a person who travels in a spacecraft into outer space

look/see

To notice or become aware of (someone or something) by using your eyes

spaceship

a vehicle that is used for travel in outer space

sky

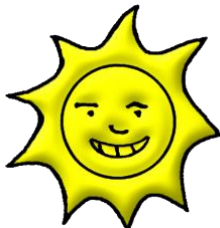

the space over the Earth where the sun, moon, stars, and clouds appear

fly

to move through the air especially at a high speed

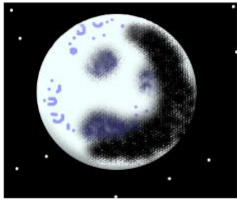

sun

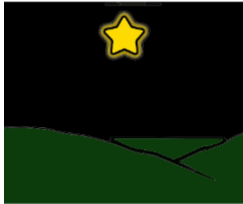

the star that the Earth moves around and that gives the Earth heat and light

moon

the large round object that circles the Earth and that shines at night by reflecting light from the sun

stars

any one of the objects in space that are made of burning gas and that look like points of light in the night sky

planet

a large, round object in space (such as the Earth) that travels around a star (such as the sun)

night

the time of darkness between one day and the next : the part of the day when no light from the sun can be seen and most people and animals sleep

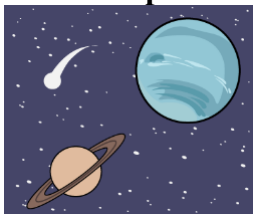

telescope

a device shaped like a long tube that you look through in order to see things that are far away

Week 5: Outer Space Vocabulary (Symbolstix)

outer space

the region beyond the Earth's atmosphere in which there are stars and planets

astronaut

a person who travels in a spacecraft into outer space

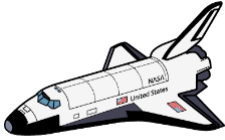

look/see

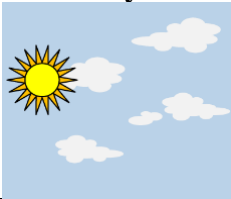

To notice or become aware of (someone or something) by using your eyes

spaceship

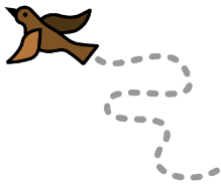

a vehicle that is used for travel in outer space

sky

the space over the Earth where the sun, moon, stars, and clouds appear

fly

to move through the air especially at a high speed

sun

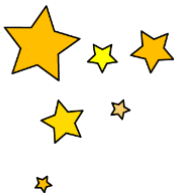

the star that the Earth moves around and that gives the Earth heat and light

moon

the large round object that circles the Earth and that shines at night by reflecting light from the sun

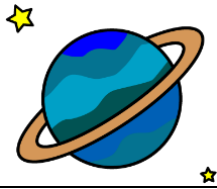

stars

any one of the objects in space that are made of burning gas and that look like points of light in the night sky

planet

a large, round object in space (such as the Earth) that travels around a star (such as the sun)

night

the time of darkness between one day and the next : the part of the day when no light from the sun can be seen and most people and animals sleep

telescope

a device shaped like a long tube that you look through in order to see things that are far away

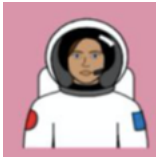

Week 5: Outer Space Vocabulary (PCS)

outer space

the region beyond the Earth's atmosphere in which there are stars and planets

astronaut

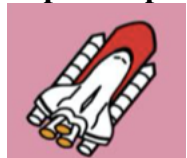

a person who travels in a spacecraft into outer space

look/see

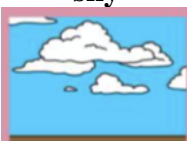

To notice or become aware of (someone or something) by using your eyes

spaceship

a vehicle that is used for travel in outer space

sky

the space over the Earth where the sun, moon, stars, and clouds appear

fly

to move through the air especially at a high speed

sun

the star that the Earth moves around and that gives the Earth heat and light

moon

the large round object that circles the Earth and that shines at night by reflecting light from the sun

stars

any one of the objects in space that are made of burning gas and that look like points of light in the night sky

planet

a large, round object in space (such as the Earth) that travels around a star (such as the sun)

night

the time of darkness between one day and the next : the part of the day when no light from the sun can be seen and most people and animals sleep

telescope

a device shaped like a long tube that you look through in order to see things that are far away
